Description work in PRO Drawing Collection

Title: PRZESTRZEN WIELOELEMENTOWA RZECZYWISTA 1, 1969  
Materials: pencil and gouache on paper  
Sizes: H29.7 x W21 cm - c H11.7 x W8.3 inches

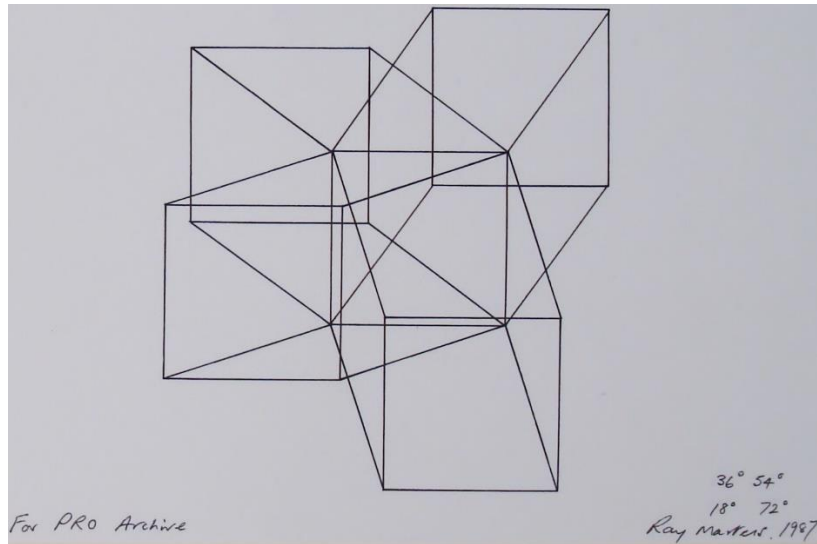

Remarks: Note the early date of this work! This work will be a pivotal early work by Winiarski. At the time we initiated the PRO Foundation, Europe was still split between the West and the communist East. Being blocked off from the West made communication challenging; we sent the PRO publications for free to artists behind the Iron Curtain. Because of his recognition and high function as director of the Academy for Fine Art Warsaw, Winiarski could frequently visit the West. He is recognized as an important Polish artist studying chance, systems and structures and widely collected in the West.
